Model EM4000

PRODUCT OVERVIEW EM4000

EM4000 is a fully AI based dual camera system for the trailers, powered by solar and rechargeable batteries. One camera is placed inside the trailer and another camera is mounted on the top front of the trailer.

- AI-Based Dual Camera System: One camera inside the trailer and one on the front, powered by solar and rechargeable batteries.
- Internal Camera Features: Detects space utilization, cargo loads, human trafficking, temperature, and more.
- External Camera Features: Captures images/videos of the driver, DOT and MC numbers, and any incidents/accidents.
- Cargo Monitoring: Uploads cargo pictures when parked and periodically while moving; detects and reports human trafficking.
- On-Demand Visuals: Provides on-demand video or pictures inside and outside the trailer.
- Security Features: Takes pictures when doors are opened, offers geo-fencing, GPS updates, and monitors for theft and incidents.

Tail Light Tracker Model EM200/EM300/EM600

PRODUCT OVERVIEW

TAIL LIGHT TRACKER

The Tail Light Tracker is a discreet smart GPS tracker that also has all the functionality of a tail light.

- Discreet Smart GPS Tracker: Functions as a tail light, making it hidden and easy to install.
- Continuous Charge: Charges automatically when headlights or brake lights are on.
- Near Real-Time Tracking: Provides near real-time location tracking and sharing.
- Speeding and Geo-Fence Alerts: Sends automatic alerts for speeding and geo-fence breaches.
- Remote Finding: Features flashing lights and a buzzer for easy location and alarm creation.
- Durability: IP67 waterproof and dust-resistant.
- Easy Installation: Can be installed quickly by anyone, reducing installation costs.
- Hidden Design: Discreet and hidden, making it difficult for unauthorized people to remove.
- Anti-Theft Features: Addresses the rise in trailer theft with hidden design and remote flashing light option.
